

GREYIN ECOSYSTEM

Unified Business Plan: Greyin + Salt & Pepper Lounge + FreeAgent

Strategy Version: 2.0 (Integrated Model) Target Audience: 12+ Yrs Domain Experts & Enterprise Buyers Date: August 2026

Executive Vision: An integrated, experience-gated platform connecting senior domain professionals (12+ years experience) with B2B fractional opportunities, peer-to-peer networking, and 0%-commission freelancing for community builders.

1. The Three Pillars Architecture

Pillar 1: GREYIN (B2B Enterprise Portal)

Outward-facing corporate marketplace for on-demand senior experts, principal architects, and fractional leaders. Enables hiring managers to search age-blind talent cards and contract experienced leaders without paying full-time executive recruiter overhead.

Pillar 2: SALT & PEPPER (Community Lounge)

An embedded, gated social space for verified members. Features private discussion boards, code/architecture design reviews, project showcases ("The Lab"), and informal peer-to-peer referral circles without corporate recruiter noise.

Pillar 3: FREEAGENT (0%-Commission Freelancing Engine)

A zero-fee freelance ecosystem supporting community builders. Members can showcase MVPs, offer micro-consulting services, or contract peer-to-peer while retaining 100% of their contract earnings.

2. Business & Monetization Model

Pillar / Stream	Target Audience	Core Offering	Monetization Mechanism
Salt & Pepper	Senior Professionals (12+ Yrs)	Peer lounge, project showcases, code reviews	Free / Included (Drives daily retention)
FreeAgent Engine	Community Builders & Consultants	Peer freelancing & gig exchange	0% Commission (Community support feature)

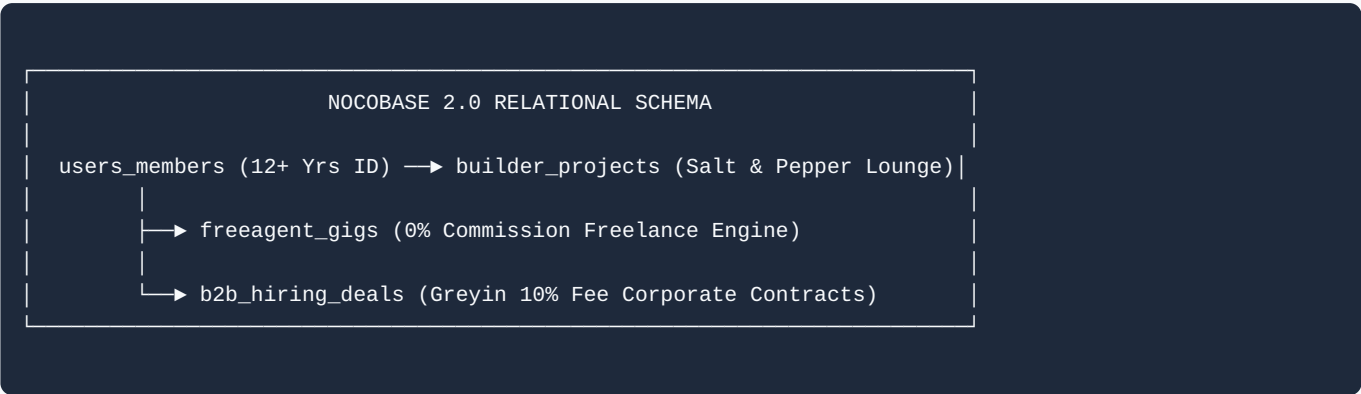

Pillar / Stream	Target Audience	Core Offering	Monetization Mechanism
Greyin B2B Placements	Corporate Buyers & Tech OEMs	Fractional C-suite, architects & interim leads	10% Client-Side Fee (Paid by employer)
Enterprise Outplacement	HR Leads & Downsizing Enterprises	Bulk transition packages for departing staff	\$2,500 - \$10,000 / Package (B2B License)

3. Self-Hosted Tech Stack & NocoBase Blueprint

The entire ecosystem is designed to run 100% free and self-hosted via Docker using open-source tools:

- **NocoBase 2.0 (App Builder):** Manages visual relational collections, multi-space layouts, and RBAC permissions.
- **PostgreSQL 16 (Database):** Secure relational storage for verified member profiles, project showcases, and B2B contracts.
- **Authentik / Keycloak (Identity):** Local OIDC/OAuth provider handling age-blind experience verification workflows.
- **Meilisearch (Search Engine):** Fast, age-blind capability matching across member skills and domain depth.

Database Collection Architecture

4. Strategic Growth & Flywheel Effect

1. **Talent Acquisition:** Senior talent joins for free peer interaction in *Salt & Pepper* and 0%-fee freelancing in *FreeAgent*.
2. **Proof of Work:** Members showcase real open-source systems, architectures, and tools in the Lounge.
3. **Enterprise Attraction:** Corporate clients pay *Greyin* to access a verified pool of active practitioners.
4. **Reinvestment:** B2B revenue funds platform infrastructure and community support.
